Essential Supplies

# EVENT LIGHTING COURSE

Our one day workshop is specifically aimed at those working within the events industry. We shall cover methods and types of lighting and how to install your system.

- What is light? How do we make it? - a little background science.
- It's not all Black and White! - a guide to colour and brightness .
- Methods of lighting - uplight, downlight, front light, back light, washing, projection and decoration.
- Types of lighting equipment and typical applications—the advantages and disadvantages of al kinds of equipment .
- Controlling light, optically, mechanically and electronically
- LED's, How to get the best from LED lighting
- Choosing cables and power distribution—how much power will I need?
- Installing your system safely—rigging, power, lasers...
- Be Bright! - Intelligent light?
- Smoke and mirrors—special effects and how to get a little more from your equipment.

This is a non examined course and provides no formal qualification; it is a designed to help candidates with lighting. Candidates will receive a certificate of attendance upon completion, and a set of course notes.

**Price per delegate £200.00 plus VAT**
