## PAT TESTING COURSE

The aim of our one day 'practical' workshop is to obtain an understanding of why PAT Testing is necessary and be able to demonstrate safely and accurately all aspects of electrical testing necessary to perform PAT tests on your own or other peoples electrical equipment.

The course is specially designed for those within the events industry, looking at key products unique to the events world. The testing techniques learnt can be used in any industry. You will be shown how to PAT test a wide range of our products from extension leads to metal light fittings and from simple distribution boards to power tools. We aim to have a maximum of 6 candidates on each course, to ensure you get the most out of the session.

If you have already purchased a PAT tester you are welcome to bring it along to ensure that you get the best from it. Alternatively we will give you advice on testers to buy.

### TIMETABLE

#### **9.30 Course Starts**

*Why test? Who's responsible? Basic electrical theory, classification of appliances,*

#### **Coffee Break**

*Tests Required, Pass and Fail Parameters, Record Keeping, Test Intervals*
